

Fair Housing Resources

The City of Logan promotes the idea that all residents of Logan (and everywhere else for that matter) should be able to "Live Free Without Discrimination". At times, landlords, property managers, and others, unjustly discriminate against those seeking housing. Sometimes this is blatant and intentional, while other times this occurs quite unintentionally. Whether it is intentional or unintentional, housing discrimination breaks local, state, and federal laws. We invite all residents to become familiar with these important laws in order to avoid violating them.

We hope the following links will help:

- to point landlords, property owners, and tenants, alike, to education about housing discrimination;
- to direct those who have been discriminated against to find remedies; and
- all to work towards the elimination of housing discrimination in Logan!
