ERICK GRIFFITHS

Erick has been with the City of Logan Environmental Department since 2008 assigned at that time to the Waste Water projects at the Lagoons and for the last 1 ½ years as Engineer (EIT) for the department. During this time Erick has proven to be a very competent, valuable employee. His expertise and knowledge is called upon and used vastly by the department as a whole. Erick supports Landfill, Waste Water management by helping to insure compliance with permits, storm drainage, wetlands issues as well as other environmental issues and services. He also works closely with them on their projects offering his time and abilities to ensure high quality results. Erick's job description also entails technical design projects, coordinating completion according to plans and specifications; runs technical computer models, including GIS maps and specifications. Erick has a strong work ethic that is noticed by all who work beside him. He has a quiet, friendly demeanor and is respected and liked by all in the department. Congratulations, Erick.
