

Environmental Department

Employee of the Month

September 2010

Bruce Douglas

Bruce is an Equipment Operator with the City of Logan Environmental Department assigned to the Residential

Crew. He has worked hard to learn the details of his job and become a team player. He watches his cans and coordinates with the office and the landfill to divert hazardous waste from entering the mainstream waste at the face. He is courteous to customers and takes the time to help educate them as to the guidelines of refuse collection. Even though he has only been here a year he has demonstrated a good knowledge about his truck and routing. Bruce works hard to provide exceptional customer service and often goes beyond the required to help customers and employees alike. Congratulations Bruce.
