

Environmental  
Department

Employee of the Month

August, 2010

STEVE ALLISON

Steve has been with the Environmental Department since 1987. He began his career with the City in the Collection Division assigned to the curbside crew. He has seen the department grow and change greatly in his tenure. His assignments have given him experience with every type of truck in the department. At the start of his career he was assigned to the curbside collection service when refuse was still thrown by hand, then in the early 90's the automated trucks arrived. In the late 90's he was assigned to commercial collection, gaining experience with the front loads, then eventually in Green Waste service with the roll offs and bulk truck. When the recycling efforts came to fruition in the late 90's and early 2000 he was assigned the county wide routing to pick up mixed paper, glass, tin, aluminum etc.; eventually he was assigned to the cardboard route for commercial and residential collection. For the last two years Steve has been with the Forestry crew assisting the City Forester with the beautification and urban efforts within Logan City limits. Steve has always been concerned with customer service and has often been found going the extra mile to meet the demands of his job and customer care. His fellow employees consider him to be kind, diligent, efficient and a dependable hard working coworker. Steve will always dive in to new assignments with enthusiasm, learning all he can so he can perform his responsibilities to the best of his ability. Steve is a committed, positive employee and we are proud to have him as part of our team. Congratulations Steve.
