

US-91/SR-252

INTERSECTION IMPROVEMENTS 10TH WEST INTERSECTION

In order to increase safety and traffic flow, UDOT is proposing the following changes at the SR-252 (1000 West) and US 89/91 intersection, (the intersection south of the Exxon Common Cents Gas Station):

- 1) Placing a signal at the intersection of 1000 West and US-89/91
- 2) Adding duel left-turn lanes on US-89/91
- 3) Adding a right-turn lane into the future South/East leg of this intersection
- 4) Closing the intersection at 1800 South and US-91
- 5) Closing the intersection at 1200 West and US-91

We would like to share the plans for these modifications as well as the proposed future road design plans for this area. Please join us at a public open house on Wednesday, June 14, from 5 – 7 p.m. at the Thomas Edison Charter School, 1275 West 2350 South, in Nibley.

The project team will be present at the open house to address comments that you may have. If you cannot attend the open house, feel free to contact our public information coordinator with any questions or comments that you might have, by calling (800) 278-4282 or by e-mailing us at 10thwestintersection@utah.gov.
