

Logan River at Rendezvous Park Channel and Floodplain Restoration

Questions and Answers

This information is hereby attached to and made part of the Bid Request Documents

July 19, 2017

Question 1: Where is the excess fill to be delivered?

Answer 1: The excess fill will be delivered to Trapper Park at 1500 South 1600 West. The specific field is west of the park entrance near the shed and immediately south of the canal (less than 2 miles from Rendezvous Park).

July 21, 2017 – Updated – Aerial view of delivery site added on Page 2.

Question 2: Is a list of contractors available that can grow and install riparian plantings for Lines 26-29 on the Bid Schedule?

Answer 2: High Mountain Nursery
271 W Bitterbrush Lane, Green Building
Draper UT 84020
Toll Free 888-832-1262
Fax 435-615-6690

Spring Creek Landscape LLC
PO Box 313
Heber City UT 84032
Phone 801.860.8162
mikemcnally85@gmail.com

Please note: It was expressed during the pre-bid meeting that we prefer willow and cottonwood cuttings for the 21- and 30-inch tall pots to come from native trees in the Logan River watershed. We anticipate that the contractor will collect cuttings as soon as they get a notice to proceed, and grow roots in the tall pots so that the plantings will be ready late fall for installation.
