

Announcing Logan City's NEW Green Power Program

What is Green Power?

The Green Power Program gives Logan City Light & Power customers the opportunity to assist Logan City Light and Power in securing renewable energy resources and become more energy independent.

How much does Green Power cost?

Renewable energy is sold in “green blocks” of **100 kWh for \$2.00**. This is in addition to regular electric charges. A customer may purchase as many blocks as they wish.

How does Green Power work?

When Logan City Light & Power customers enroll in the Green Power program the money is kept in a separate account for future purchase and/or investment in renewable electric resources. We hope to be able to secure a good mixture of community-based renewable energy projects when possible.

Customers will have the opportunity to identify their preference as to which type of renewable energy they would like Logan City to invest in. Although Logan City's overreaching goal is to incorporate a variety of affordable and reliable power resources, Logan City will take into account consumer preference when possible.

This is a voluntary program and customers can cancel at any time.

How do I know where my money is going?

Logan City will document and verify each individual's investments in the Green Power Program and notify participants of specific renewable energy and conservation projects that are initiated and pursued as a result of the participant's contribution. Logan City will make every effort to target the specific types of projects as requested by the participants. The funds may go toward the purchase, development, and/or research of renewable energy and/or conservation resources, and will continually work towards making Logan City a more energy independent community.

Find out how to enroll
in the GREEN POWER program
on the back of this page!

Start supporting RENEWABLE ENERGY in Logan today!

Enrollment is EASY, here's how:

Simply fill out the form below and return it with your utility payment or mail to

City of Logan Environmental Department
Attn: Green Power Program
450 N 1000 W
Logan, UT 84321

Please be aware of the following:

- ✓ Fill out the form completely, including your utility account number.
- ✓ Indicate the number of 100 kWh blocks you would like to subscribe to.
- ✓ Total your monthly charge by multiplying the number of desired blocks by \$2.00.
- ✓ Copies of this form will be available on our website at <http://conservation.loganutah.org>.
- ✓ Please feel free to call or e-mail with questions: 435-716-9792 or emily.malik@loganutah.org.

YES! Enroll me in Logan City's GREEN POWER Program!

Name (on account): _____

Address (on account): _____

Phone: _____ Alternate Phone: _____

Logan City Account Number: _____ -- _____

E-Mail Address: _____

Preferred method of contact for program notifications: Standard Mail E-Mail

Each 100 kWh block of GREEN POWER costs: **\$2.00**

Number of blocks desired: _____ **X**

This will create an additional charge of** : \$ _____ on my monthly Logan City Utility Bill.
(*Please total the above information**)

My preference is that Logan City pursue the following type(s) of GREEN POWER (check all that apply):

Solar Micro-Hydro Wind Geothermal Conservation/Demand Side Management

I understand that by signing below, I am agreeing to be charged an extra fee on my monthly Logan City Utility Bill in the amount indicated on this form. I understand that this fee will be placed in a fund that will be used for future renewable energy and conservation/efficiency projects in Logan City. I understand that Logan City can use collected monies for purchase, development, and research of renewable energy and/or conservation resources of their choosing, regardless of what is indicated on this application form. I understand that I can cancel this service at any time.
